Task – 1

1.
```java
import java.util.*;
public class Main {
    public static void main(String[] args) {
        System.out.println("Hello, World!");
    }
}
```

2.
```java
import java.util.Scanner;

public class JavaProgram
{
    public static void main(String args[])
    {
        int first, second, add, subtract, multiply;
        float devide;
        Scanner scanner = new Scanner(System.in);

        System.out.print("Enter Two Numbers : ");
        first = scanner.nextInt();
        second = scanner.nextInt();

        add = first + second;
        subtract = first - second;
        multiply = first * second;
        devide = (float) first / second;

        System.out.println("Sum = " + add);
        System.out.println("Difference = " + subtract);
        System.out.println("Multiplication = " + multiply);
```

```java
        System.out.println("Division = " + devide);
    }
```

3. import java.util.Scanner;

```java
public class GreetingProgram {
    public static void main(String[] args) {
        // Create a Scanner object to read user input
        Scanner scanner = new Scanner(System.in);

        // Get user input
        System.out.print("Enter your name: ");
        String name = scanner.nextLine();

        // Display output
        System.out.println("Hello, " + name + "! Welcome to our program.");

        // Close the scanner
        scanner.close();
    }
}
```
